Course content

Why Attend

Competency frameworks provide organizations with a structured approach to defining, assessing, and developing the knowledge, skills, behaviors, and capabilities required for success. This course equips participants with practical methodologies for designing, implementing, and maintaining competency frameworks that support recruitment, performance management, learning and development, succession planning, and organizational effectiveness.

Course Methodology

- The course combines presentations, workshops, competency mapping exercises, case studies, group discussions, practical framework design activities, and real-world implementation scenarios to ensure practical application and workplace relevance.

Course Objectives

- Understand the principles and benefits of competency frameworks
- Design competency models aligned with organizational strategy
- Develop behavioral and technical competency structures
- Integrate competencies into HR and talent management processes
- Establish competency assessment and measurement methods
- Implement competency frameworks effectively across the organization

Target Audience

- HR managers and professionals
- Talent management specialists
- Learning and development professionals
- Organizational development practitioners

Course outline

Detailed course outline
