Course content

Why Attend

This Measuring and Reporting Carbon Footprint training course provides an in-depth understanding of carbon footprint measurement and reporting, including its impact on the environment and business operations. The course covers the latest techniques and methodologies for calculating and reporting carbon emissions, and explores the best practices for reducing carbon footprints.

Course Methodology

Course Objectives

- Understand the concept of carbon footprint and its impact on the environment
- Identify the sources of carbon emissions in different industries and business operations
- Use different methods and tools to calculate carbon emissions
- Apply the best practices for reducing carbon footprints and implementing carbon reduction projects
- Report carbon footprints in compliance with international standards and regulations
- Analyze and interpret carbon footprint data for decision-making purposes

Target Audience

- This Measuring and Reporting Carbon Footprint training course is suitable to a wide range of professionals but will greatly benefit practitioners in the following areas:
- Environmental management
- Sustainability management
- Corporate social responsibility

Course outline

Detailed course outline

Day-by-day outline for Measuring and Reporting Carbon Footprint.

Day 1 - Introduction to Carbon Footprint

- Definition and concept of carbon footprint
- Importance and benefits of measuring and reporting carbon emissions
- Environmental and business impact of carbon footprint
- Regulatory and market drivers of carbon footprint management

Day 2 - Carbon Footprint Calculation Methods

- Overview of different carbon footprint calculation methods and tools
- Carbon accounting standards and protocols
- Data collection and management for carbon footprint calculation
- Scope 1, 2, and 3 emissions and their calculation methods

Day 3 - Carbon Footprint Reduction Strategies

- Best practices for reducing carbon footprint
- Carbon reduction projects and technologies
- Energy efficiency and renewable energy options
- Sustainable supply chain management
- Emissions trading and offsetting

Course outline

Detailed course outline

Day-by-day outline for Measuring and Reporting Carbon Footprint.

Day 4 - Carbon Footprint Reporting

- International standards and regulations for carbon footprint reporting
- Carbon disclosure and reporting frameworks
- Carbon footprint reporting for different industries and sectors
- Carbon footprint communication and stakeholder engagement

Day 5 - Carbon Footprint Analysis and Decision Making

- Interpretation and analysis of carbon footprint data
- Cost-benefit analysis of carbon reduction projects
- Carbon footprint risk assessment and management
- Carbon footprint integration into business operations and strategy
- Future trends and developments in carbon footprint management

Seminar dates

Available seminar dates

Live dates and pricing for Measuring and Reporting Carbon Footprint generated from the course details page.

Date	Location	Format	Fee
15 - 19 June 2026	Frankfurt	Classroom	€2,275
20 - 24 July 2026	Barcelona	Classroom	€2,695
3 - 7 August 2026	Frankfurt	Classroom	€2,275
7 - 11 September 2026	Rome	Classroom	€2,975
12 - 16 October 2026	Kuala Lumpur	Classroom	€1,575
9 - 13 November 2026	Barcelona	Classroom	€2,695
14 - 18 December 2026	London	Classroom	€2,940
