Course content

Why Attend

Organizations increasingly rely on programs to deliver strategic objectives, manage transformational initiatives, and realize business benefits. This course provides participants with the knowledge, tools, and best practices required to manage complex programs, align initiatives with organizational strategy, optimize benefits realization, and prepare for the Program Management Professional (PgMP) certification.

Course Methodology

- The course combines interactive presentations, workshops, case studies, program management simulations, group discussions, practical exercises, examination preparation activities, and real-world program management scenarios.

Course Objectives

- Understand the principles and framework of program management
- Align programs with organizational strategy and business objectives
- Develop and manage program governance and stakeholder engagement processes
- Plan, deliver, and monitor program benefits effectively
- Manage program risks, resources, finances, and communications
- Apply program lifecycle management methodologies

Target Audience

- Program managers
- Senior project managers
- PMO managers and directors
- Portfolio managers

Course outline
